PLATE SIZE*	4.5	5	5.5	5.75	6	6.25	6.5	6.75	7	7.5

Mounting Tips

1. ALL DERBY MOUNTS SHOULD BE 7/8" FORWARD (from back of heel) when mounting MOJO boots.
2. Speed mount is not only for speed skating, it means more speed and power. You give up a little maneuverability

SMART FIT: contoured to promote correct foot alignment. SMART FIT allows for more toe room in the toe box, encouraging the toes to flex and grip naturally. Because the fit comes from a natural shape, this helps eliminate the extra space between the front of the sole and the toes. (see figure 1, vs. figure 2). Smart Fit is a combination of several elements working together to enhance fit, function, performance and comfort.
